

Gasoline Powered Hedge Trimmer with Reciprocating Blade

This gasoline-powered hedge trimmer is equipped with a reciprocating blade. It is designed for trimming hedges and shrubs in landscaping applications, featuring an ergonomic handle and safety guard.

Product Overview

Professional Hedge Maintenance

This gasoline-powered hedge trimmer is engineered for both residential and commercial landscaping tasks. Featuring a robust two-stroke engine and a high-precision reciprocating blade made of hardened steel, it ensures durability and clean cuts for shrubs and hedges. Designed with ergonomics in mind, the unit includes an integrated safety guard and reliable ignition system for consistent performance in demanding environments.

Technical Specifications

Engine Type	Two-stroke gasoline engine
