

# Gasoline Powered Leaf Blower

This gasoline leaf blower is suitable for clearing snow, leaves, and debris from roads and grasslands, and can also be used for fire extinguishing. It features crankcase intake technology, high power, an easy starter, and a conventional handle with good shock absorption.

## Overview

### Professional Performance Overview

These gasoline-powered leaf blowers are engineered for heavy-duty landscaping and garden maintenance tasks. Designed for professionals, they feature powerful internal combustion engines capable of reaching high air speeds for efficient debris clearance. With an ergonomic design and durable construction, these units ensure reliable operation across various outdoor environments.
