Overview

Compact Soil Cultivation Solution

This gasoline-powered mini tiller is a compact and lightweight machine engineered for efficient soil preparation in gardens, vegetable plots, and small-scale farms. It features an ergonomic design with adjustable handles, ensuring ease of maneuverability even in tight spaces or challenging soil conditions. With its robust engine and durable tines, it provides reliable performance for tasks such as tilling, weeding, and seedbed preparation.

Performance

Engine Type	Gasoline
Key Features	Adjustable Tilling Depth, Adjustable Tilling Width, Ergonomic Handles, Lightweight Design
