

Gasoline Powered Single-Stage Snow Thrower

This is a single-stage snow thrower designed for residential use. It features a gasoline-powered engine that drives a rotating auger to scoop up snow and throw it out of a discharge chute.

Product Overview

Efficient Residential Snow Removal

This gasoline-powered single-stage snow thrower is engineered for reliable performance on driveways, sidewalks, and paved surfaces. Featuring a powerful four-stroke engine and a high-speed rotating auger, it efficiently scoops and clears snow in a single pass. The adjustable discharge chute and ergonomic handle design ensure precise control and maneuverability during operation.

Engine & Performance

Power Source

Gasoline Powered

Engine Type

Four-stroke gasoline engine

Operational Features

Clearing Mechanism

Rotating auger

Stage Type

Single-stage

Discharge Control

Adjustable discharge chute

Design & Handling

Mobility Features

- Integrated wheels for maneuverability
- Operator control handle
- Compact single-stage design

Application

Recommended Surfaces

Driveways, Sidewalks, Paved Surfaces

Usage Type

Residential
