

Gasoline Powered Water Pump

This gasoline-powered water pump is designed for efficient water transfer and irrigation. Featuring a durable construction, it is suitable for agricultural, construction, and emergency applications.

Product Overview

High-Performance Gasoline Water Pump

This gasoline-powered water pump is engineered for efficient water transfer and irrigation tasks. Featuring a durable construction, it is perfectly suited for agricultural, construction, and emergency applications. Powered by a reliable 2-stroke gasoline engine, this unit delivers high performance while maintaining excellent portability. Its sturdy frame design ensures stability and reduces vibration, promoting long-lasting operation and easier maintenance.

Technical Specifications

Engine Type	2-stroke gasoline engine
Key Features	High Performance, Portable, Vibration Reduction, Easy Maintenance

Applications

Suitable Applications

- Agricultural irrigation
- Construction site water transfer
- Emergency water drainage
