

# Gasoline Powered Water Pump

This self-priming centrifugal water pump is designed for high-volume water transfer applications. Powered by a robust gasoline engine, it delivers reliable performance for irrigation, construction, and emergency water removal.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Water Transfer Solution

The WP60X is a self-priming centrifugal water pump engineered for high-volume water transfer across irrigation, construction, and emergency drainage applications. It is powered by a robust gasoline engine and features a heavy-duty frame to ensure operational stability and protection in demanding work environments. Built for reliability, this unit incorporates a cast iron impeller and volute to enhance durability during long-term operation.

## Technical Features

### Product Highlights

Self-priming, Centrifugal design, Gasoline powered, Cast iron impeller, Recoil starter

## Application & Usage

### Suitable Applications

- Agricultural irrigation
- Construction site water management
- Emergency water removal
- High-volume transfer tasks
