

Gasoline Powered Water Pump

This gasoline-powered water pump is designed for efficient water transfer. It features a durable construction with a cast iron impeller and volute for long-lasting performance.

Overview

High-Performance Gasoline Water Pump

The SUZ40-35-142F is a robust gasoline-powered water pump engineered for efficient water transfer across diverse applications. Featuring durable construction with a cast iron impeller and volute, this unit ensures long-lasting performance and reliability. It is an ideal solution for irrigation, construction sites, and general water pumping needs, offering both high flow rates and dependable suction lift capabilities.

Technical Specifications

Model Number	SUZ40-35-142F
Construction Materials	Cast Iron Impeller, Cast Iron Volute

Key Performance Metrics

Performance Highlights

1 Gasoline
Engine Type

Applications

Recommended Applications

- Agricultural Irrigation
- Construction Site Dewatering
- General Water Transfer
