Overview

High-Performance Gasoline Water Pump

This self-priming gasoline water pump is engineered for efficient, high-volume water transfer across a variety of demanding environments. Built with a durable metal housing and a sturdy protective frame, it provides reliable performance for irrigation, construction sites, and emergency water removal. The unit is designed for easy integration into existing setups with standard hose connection ports.

Technical Specifications

Pump Type	Trash Water Pump
Port Size	3 inch
Engine Model	CBS210F

Applications

Suitable Applications	Irrigation, Construction, Emergency Water Removal, General Water Transfer
-----------------------	---

Features

Key Features

- Self-priming capability
- Durable metal pump housing
- Sturdy protective frame
- Standard inlet and outlet connections
