

Gasoline Powered Water Transfer Pump

This portable water pump is designed for irrigation, drainage, and general water transfer applications. It features a gasoline engine, centrifugal pump mechanism, sturdy frame, carry handle, and mounting base.

Product Overview

Versatile Water Transfer Solution

This portable gasoline-powered water transfer pump is engineered for efficient irrigation, drainage, and general water movement tasks. Its robust design features a durable cast aluminum pump housing for superior corrosion resistance and a stable frame for secure placement. Equipped with a reliable engine, it offers a compact and mobile solution for demanding industrial or agricultural environments.

Technical Specifications

Engine Power Rating

2.8 kW

Power Rating

Model Identifier

ST 80

Design Features

Ease of Use

- Integrated carry handle
- Base plate with mounting holes
- Portable design

Construction Materials

Cast Aluminum Housing, Steel Frame

Applications

Suitable Applications

Irrigation • Drainage • General Water Transfer
