Product Overview

High-Performance Water Transfer

This gasoline-powered water transfer pump is engineered for reliable and efficient fluid movement in demanding environments. Featuring a robust 5.5hp engine and a durable housing, it is perfectly suited for agricultural irrigation, construction site dewatering, and emergency water removal. Its self-priming design and sturdy frame ensure both ease of use and long-term durability for professional applications.

Engine Specifications

Engine Model	168f
Power Output	5.5 hp
Displacement	163 cc
Rated Rotational Speed	3600 rpm

Performance Metrics

Performance Highlights

370 L/min

Discharge Capacity

26 m

Pump Lift

8 m
