

Gasoline Powered Water Transfer Pump

This gasoline water pump is designed for efficient water transfer in various applications. It features a robust engine for reliable performance and a durable pump housing for long-lasting use.

Overview

High-Performance Water Transfer

This gasoline-powered water pump is engineered for efficient fluid transfer across diverse applications, including agricultural irrigation, construction site management, and emergency water removal. Built with a robust engine and durable housing, it delivers reliable performance and longevity. The unit features a sturdy protective frame for enhanced durability and portability, combined with a self-priming system for quick and easy operation.

Technical Specifications

Key Operational Features

- High flow rate
- Self-priming capability
- Easy start system
- Durable pump housing
- Protective frame

Identification Data

Parameter	Value
Model Code	EX1
Production Number	170DZ0082
Serial Number	2175110

Compliance & Certification

EU (II) 13-97/685
