

Gasoline Powered Wood Cutting Chainsaw

This gasoline chainsaw is a powerful and reliable tool designed for cutting wood. It features a durable cutting chain and guide bar, ensuring efficient and precise cuts.

Product Overview

High-Performance Gasoline Chainsaw

This gasoline-powered chainsaw is engineered for reliability and power, making it an essential tool for diverse wood-cutting applications. Designed with an ergonomic frame and an integrated anti-vibration system, it ensures comfortable handling and minimizes user fatigue during prolonged operation. Whether for professional tree felling, branch pruning, or firewood preparation, this unit delivers efficient and precise cutting performance.

Technical Specifications

Model Identifier	NT3200
Power Source	Gasoline Engine

Key Features

Ideal Applications

- Tree felling
- Branch pruning
- Firewood cutting

Ergonomic Features	Anti-vibration system, Ergonomic handle design
