### Product Overview

#### Precision Gear Housing Assembly

This gear housing assembly is engineered for robust performance in mechanical systems. Featuring a durable white housing design, it includes integrated shafts and precise mounting points to ensure stable operation. The configuration includes specialized shaft dimensions and multiple attachment points, making it a reliable component for your assembly needs.

### Technical Specifications

Total Shaft Diameter	30 mm
Shaft Configuration	25mm + 5mm
Mounting Features	5 outer holes, 3 screws
Pulley Compatibility	No
Gear Teeth (Z)	11
