

Gear Motor for Industrial Applications

This gear motor is engineered for efficient power transmission and smooth operation. It is suitable for use in warehousing logistics, packaging machinery, glass machinery, machine tools and other industries.

Overview

High-Performance Industrial Gear Motor

This gear motor is engineered for demanding industrial environments, featuring robust construction to ensure durability and a long service life. It provides efficient power transmission, smooth operation, and precise speed control, making it an ideal choice for a variety of machinery requiring high torque output. Designed for easy installation and maintenance, this unit minimizes downtime while offering flexible configurations to meet specific operational needs.

Technical Specifications

Input Power Range

0.12 kW

Min Power

200 kW

Max Power

Model Range

63~315

Efficiency Class

IE2, IE3

Efficiency Applicability

IE2 and IE3 efficiency classes applicable for 0.75kW to 200kW models
