

General Purpose Bearing

This general purpose bearing enables smooth rotational motion. It is suitable for reducing friction in mechanical systems.

Product Overview

Versatile General Purpose Bearing

This general purpose bearing is engineered to provide reliable performance and smooth operation across a wide range of industrial and mechanical applications. Designed with durability in mind, it offers consistent load-bearing capabilities and efficient rotation for standard machinery setups. Its robust construction ensures longevity and stability, making it a dependable choice for various maintenance and assembly requirements.

Key Metrics

Rated Load Capacity

1500 N

Dynamic Load

800 N

Static Load

Technical Details

Seal Type

2RS (Rubber Sealed)

Bearing Type

Deep Groove Ball Bearing

Material

Carbon Steel, Chrome Plated

Tolerance Class

P0 (Normal)

Dimensions

Dimensions Table

Dimension Type	Value	Unit
Inner Diameter	20	mm
Outer Diameter	47	mm
Width	14	mm

Compliance

Certifications

- ISO 9001:2015
- RoHS Compliant
