

German-Type 500A Electrode Holder

This German-type electrode holder is designed for manual metal arc welding (MMAW) and shielded metal arc welding (SMAW). It securely grips welding electrodes of various sizes, facilitating efficient and safe welding operations.

Overview

German-Type Electrode Holder

This German-type electrode holder is engineered for manual metal arc welding (MMAW) applications. It features an ergonomic design to reduce operator fatigue during extended use and is constructed from high-quality materials for superior heat resistance and durability. The robust clamping mechanism allows for quick and efficient electrode changes, ensuring reliability in demanding welding environments.

Welding Process

MMAW, SMAW, Stick Welding

Safety & Design

Safety Features

- Insulated handle for electrical shock protection
- Ergonomic design to reduce fatigue
- Robust clamping mechanism

Design Style

German-Type
