Product Overview

GFCI Duplex Receptacle

These self-test GFCI receptacles are designed to provide essential electrical safety in both residential and commercial environments. Engineered from resilient thermoplastic, the unit is built to withstand high torque levels during installation. The device features integrated Test and Reset buttons to ensure reliable ground fault protection for end-users.

Technical Specifications

Compatibility

- Combination guide light models available
- Residential application
- Commercial application

Socket Configuration

Duplex Receptacle

Safety Options

Tamper-Resistant, Non Tamper-Resistant, Self-Test

Body Material

Resilient thermoplastic
