

Glass Dish Forming Mould

This precision-engineered mould is designed for the production of glass dishes. It features intricate detailing and robust construction to ensure consistent, high-quality results.

Overview

Precision Glass Dish Forming Mould

This precision-engineered mould is specifically designed for the efficient production of high-quality glass dishes. Built with a robust construction, it is manufactured from durable materials capable of withstanding the extreme temperatures and stress of repeated industrial use. The design features a central cavity for primary dish formation, complemented by intricate patterns for decorative elements, ensuring consistent and professional results.

Technical Specifications

Design Features

- Central cavity for dish formation
- Intricate pattern detailing
- Secure mounting base
- High-temperature resistant materials

Application	Glass dish production
Compatibility	Glass forming machinery

Quality & Compliance

Construction Quality	Robust, Durable, Precision-engineered
