

Glass Electric Kettle with Auto Shut-Off

This electric kettle is designed for rapid and efficient water boiling. It features a transparent glass body for monitoring water levels and a stainless steel base for durability.

Product Overview

Modern Glass Electric Kettle

This electric kettle features a transparent glass body that allows for easy monitoring of water levels and the boiling process. Built with a stainless steel base and internal components, it ensures both durability and hygiene for daily use. The design includes a comfortable black plastic handle and a secure lid, combining practical functionality with a modern aesthetic suitable for any kitchen setting.
