

Glass Electric Kettle with LED Illumination

This electric kettle features a transparent glass body with water level markings and internal blue LED illumination. It is designed for rapid boiling and includes a concealed heating element, automatic shut-off, and boil-dry protection.

Product Overview

High-quality borosilicate glass kettle featuring a blue LED indicator and health-conscious design.

Modern Glass Electric Kettle

This electric kettle features a high-quality borosilicate glass body, ensuring durability and resistance to thermal shock. Designed for health and safety, it is crafted to be free from high manganese content, providing a safer drinking experience. The sleek, modern design includes an internal blue LED that illuminates the water during operation, making it a stylish addition to any kitchen.
