

Grader Blade for Motor Graders

These grader blades are designed for motor graders used in road construction and maintenance. They are constructed from durable materials for long-lasting performance and resistance to wear.

Product Overview

High-Performance Grader Blades

These grader blades, cutting edges, and end bits are precision-engineered for heavy-duty earthmoving and road maintenance applications. Constructed from durable, wear-resistant materials, they are designed to withstand rigorous operational conditions. The blades feature accurately positioned mounting holes to ensure secure attachment and optimal performance across various grading tasks.

Available Types

Flat Edges, Serrated Edges, Curved Edges, Cutting Edges, End Bits

Additional Wear Parts

Other Available Wear Parts

- Tooth / Tooth Tip / Tooth Point
- Tooth Pin
- Tooth Adapter / Tooth Holder
- Wear Caps
- Lip Shrouds
- Heel Shrouds
- Kwiklok Liners
- Ripper Tooth Shanks
- Side Cutters / Wing Shrouds
