

Grain Drying System

This high-efficiency grain drying system is engineered for optimal preservation. It features adjustable temperature and airflow control for precise operation and is constructed with durable materials.

Overview

High-Efficiency Grain Drying Solutions

This batch circulating grain dryer is designed for optimal moisture reduction across various grain types. It features a multi-stage drying system with adjustable temperature and airflow controls, ensuring consistent and high-quality output. Built with durable materials, the system is engineered for long-lasting performance, minimal maintenance, and precise operational control.

Technical Specifications

Model Specifications

| Model Name | Capacity (m ³) | Batch Processing (t) | Drying Speed (%/h) | Dimensions (L*W*H mm) |
|------------|----------------------------|----------------------|--------------------|-----------------------|
| 5HXG-15 | 27.06 | 15 | 0.4-0.8 | 4379*2230*9670 |
| 5HXG-20 | 36 | 20 | 0.5-1 | 2376*2566*9556 |
| 5HXG-30 | 54.2 | 30 | 0.5-1 | 5160*3814*12455 |

| | |

Key Features

System Highlights

- Multi-stage drying system
- Adjustable temperature control
- Adjustable airflow control
- User-friendly control panel
- Durable construction
