

Grinding Wheel - 125mm, for Stainless Steel

This grinding wheel is designed for use with grinders, specifically for grinding stainless steel. It provides efficient material removal and a smooth finish.

Product Overview

Engineered for efficient material removal and a smooth finish on stainless steel surfaces.

High-Performance Stainless Steel Grinding

This professional-grade grinding wheel is specifically engineered for efficient material removal and precise finishing on stainless steel surfaces. Designed for use with standard angle grinders, it offers a durable construction that ensures long-lasting performance and high resistance to wear. It is an ideal solution for industrial applications requiring smooth finishes and reliable operation under high-speed conditions.

Performance Highlights

125 mm
Diameter

12250 RPM
Max Speed

80 m/s
Max Velocity

Technical Dimensions

Physical Specifications

| Dimension | Value (Metric) | Value (Imperial) |
|---------------------|----------------|------------------|
| Outer Diameter (D1) | 125 mm | 5" |
| Bore Diameter (D2) | 22.23 mm | 7/8" |
| Thickness (T) | 6.4 mm | 0.25" |

Product Code: CADG-SG6422125

Application & Material

Durable construction suitable for high-performance grinding with standard angle grinders.

Target Materials

Stainless Steel, Metal

Abrasive Type

WA24R BF-T27

Compliance & Standards

Safety Compliance

EN12413

Logistics & Packaging

Quantity per Pack

- Inner Box: 5 pcs
- Medium Box: 25 pcs
- Master Carton: 100 pcs

Carton Dimensions (L x W x H)

40 x 27 x 15 cm

EAN-13

7640177426642
