

Grinding Wheel for Material Finishing

This grinding wheel is designed for sanding, polishing, and material removal using power tools. It features a smooth, uniform surface ideal for fine finishing and general grinding tasks.

Product Overview

Professional Material Finishing

This high-quality grinding wheel is engineered for precision material finishing, sanding, and polishing applications. Designed with a uniform abrasive composition, it ensures consistent material removal and surface refinement. The wheel features a standard central mounting hole, making it compatible with a wide range of power tools for versatile industrial use.

Physical Characteristics

Shape	Circular
Color/Finish	White

Application

Tool Compatibility	Power Tools • Grinders
Primary Applications	Sanding, Polishing, Material Removal, Finishing
