

GT1749V Turbocharger for Volkswagen

This turbocharger is engineered for Volkswagen vehicles to boost engine performance. It optimizes air intake, resulting in enhanced horsepower and torque.

Product Overview

Performance Turbocharger for Volkswagen

The GT1749V turbocharger is engineered to significantly enhance engine performance by forcing additional air into the combustion chamber. Featuring a variable nozzle turbine (VNT) design, it provides optimized boost control across diverse engine speeds for improved horsepower and torque. Built with high-quality materials, this unit is designed to provide reliable, long-term service as a direct replacement or performance upgrade.
