Overview

Energy-Efficient Illumination

This LED GU10 bulb serves as a high-performance, energy-efficient replacement for traditional halogen lighting. Designed for both residential and commercial environments, it offers instant-on functionality and a wide beam angle suitable for accent, task, and general illumination. Its durable construction and long lifespan ensure reliable performance while significantly reducing energy consumption and maintenance needs.

Technical Specifications

Base Type	GU10
Key Features	Energy Efficient, Instant-on, Long Lifespan, Wide Beam Angle

Performance Metrics

Performance Highlights

1 High Energy Efficiency	1 Low Maintenance Requirement
