

Hand Brace Auger Bit with Dual Spurs

This hand brace auger bit is designed for manual drilling applications. It features a dual-spur cutting head for efficient and clean hole creation and is constructed from hardened steel for durability.

HAND DRIVE AUGER BITS WITH TWO SPURS.

Product Overview

Professional Hand Brace Auger Bits

These hand driver auger bits are engineered specifically for manual drilling applications, featuring a specialized dual-spur cutting head that ensures efficient and clean hole creation. Constructed from high-quality hardened steel, they are built to provide exceptional durability and long service life. Perfectly suited for woodworking, construction, and various tasks requiring precise, controlled hole boring.

Technical Specifications

Cutting Head	Dual-Spur
Material	Hardened Steel
Primary Application	Woodworking, Construction, Manual Drilling
Compatible Tools	Hand Brace / Manual Driving Tools
