

Hand-Crank and Solar Powered LED Torch

This compact lighting device features both a hand-crank dynamo and a solar panel for versatile charging. Its LED light source delivers an eco-friendly and dependable illumination solution suitable for various scenarios.

Product Overview

Sustainable Illumination

This compact LED torch offers a versatile, eco-friendly lighting solution designed for emergencies, outdoor adventures, and everyday reliability. It features a dual-charging system that integrates a manual hand-crank dynamo with a highly efficient solar panel. This combination ensures that users always have access to light, regardless of external power sources.
