

Hand Pallet Truck

This hand pallet truck is equipped with an advanced hydraulic system for high quality performance. Key turning points are fitted with self-lubricating bearings to reduce operating power and prolong the truck's life.

Product Overview

Heavy-Duty Material Handling Solution

This hand pallet truck is engineered for efficient and reliable material handling in demanding environments like warehouses, factories, and distribution centers. Built with a durable steel frame and a robust hydraulic system, it ensures smooth lifting and lowering operations. The ergonomic handle design promotes operator comfort, while the high-quality wheels allow for easy maneuverability across various floor types.

Key Metrics

Performance Highlights

2500 kg
Load Capacity

200 mm
Max Lift Height

Construction & Design

Frame Material	Reinforced Steel
Wheel Material	Polyurethane
Handle Design	Ergonomic 3-position control

Operational Features

Safety Features

- Overload protection valve
- Safety relief valve
- Foot release control

Certifications	CE Certified, ISO 9001
