

Handheld Blower Vacuum with 22.5cm³ Engine

This handheld blower vacuum is designed for efficient garden maintenance. Its double-face impeller structure strengthens the wind, enhancing cleaning efficiency, and it can also be configured as a vacuum with an attached collection bag for easy cleanup.

Product Overview

Versatile Garden Maintenance

This handheld blower and vacuum unit is designed to make garden cleanup faster and more efficient. It features an easy-starting engine that balances high air volume with reduced noise, vibration, and emissions. The dual-function design allows for seamless switching between blowing debris and vacuuming with an attached collection bag.

Engine & Performance

Power Output

0.65 kW
Power

0.85 hp
Power

Engine Displacement	22.5 cm ³
Average Air Volume	0.13 m ³ /s

Compliance & Standards
