Product Overview

Professional Concrete Surface Preparation

This handheld concrete floor scabbler is engineered for high-efficiency surface repair and reinforcement. Equipped with dual tungsten-steel heads, it provides consistent roughness and removes floating grout to ensure firm bonding for subsequent layers. Designed for versatility, this tool is an essential asset for highway, bridge, and municipal concrete renovation projects.

Technical Specifications

Performance Metrics

4800 number/min
Hit Frequency

4 kg
Weight

31 mm
Chisel Head Diameter

65 mm
Cutting Width

Output Capacity

Metric	Value
Chiseling Capacity	4-8 square meters/h
Cut Depth	2-4 mm
Service Life	3000+ m ²

Application & Features

Primary Applications

- Highway concrete pavement repair
- Railway bridge and box girder surface preparation
- Municipal engineering reinforcement
- Removal of floating grout
- Concrete surface roughening for bonding

Product Highlights

Handheld, Tungsten Steel Heads, Flexible Operation, Durable Construction
