

Handheld Immersion Blender

This hand blender is designed for efficient food processing. It features a durable stainless steel blending shaft and a powerful motor for smooth, consistent results, ideal for blending soups, sauces, smoothies, and more.

Product Overview

Professional Performance Immersion Blender

This versatile handheld immersion blender is designed for efficient food processing in professional kitchen environments. Featuring a durable stainless steel 201 blending shaft and a robust 500W copper motor, it delivers smooth and consistent results for soups, sauces, and smoothies. The ergonomic design ensures a comfortable grip during operation, while the modular construction allows for easy disassembly, cleaning, and storage.
