

Handheld PDA Computer

This is a handheld personal digital assistant (PDA) computer. It offers portable computing for various applications.

Product Overview

Professional Handheld PDA Solution

This handheld PDA computer is designed to streamline operations across a wide range of industries including logistics, warehousing, retail, and security. By integrating advanced RFID reading and writing capabilities, it provides a robust solution for information management and asset tracking. Its versatile architecture helps businesses increase operational efficiency and solve complex field challenges with targeted application solutions.

Key Features

RFID Functionality

- High-frequency RFID reading
- High-frequency RFID writing
- Electronic tag support
- Asset tracking and management
- Anti-counterfeiting verification

Supported Industries

Transportation, Logistics, Warehousing, Retail, Security, Tourism, Customs
