

Handheld Ratcheting Cable Cutter

This hand-operated cable cutter is designed for cutting copper and aluminum cables. It features a ratchet mechanism for easily cutting large diameter cables.

Product Overview

Professional Ratcheting Cable Cutter

The CC-325 handheld cable cutter is engineered for efficiency, featuring a robust ratcheting mechanism that significantly reduces the manual effort required for cutting copper and aluminum cables. Built with high-quality forged blades, this tool ensures clean, precise cuts with an extended service life. Its compact design and integrated safety lock make it an essential, reliable tool for electrical installation and maintenance professionals.

Technical Specifications

Max Cutting Range	240 mm ²
Length	260 mm
Weight	0.7 kg
Construction Material	Iron

Features & Safety

Prohibited Materials
