

Hardened Steel Shackle Padlock

This heavy-duty padlock features a hardened steel shackle for enhanced security. The lock body is constructed from durable materials, providing protection against corrosion and weather elements.

Product Overview

Heavy-Duty Security Solution

This hardened steel shackle padlock is engineered for robust security and long-term durability. Featuring a protective plastic wrap, it offers enhanced resistance against environmental elements and corrosion, making it suitable for both indoor and outdoor applications. Its hardened steel construction is specifically designed to resist cutting attempts, providing reliable protection for gates, storage units, and valuable assets.

Physical Characteristics

Shackle Material	Hardened Steel
Body Finish	Plastic wrapped

Features

Ideal Applications

- Gates
- Sheds
- Storage Units
- General Valuables

Security Features	Hardened Shackle, Cut Resistant, Corrosion Resistant, Weather Resistant
