

Hay and Straw Chaff Cutter

This chaff cutter efficiently processes agricultural materials like hay and straw. Its heavy-duty construction and adjustable settings provide reliable performance for livestock feeding and agricultural applications.

ADDITIONAL IMAGES

Overview

Versatile Agricultural Processing

This robust chaff cutter is engineered for the efficient processing of agricultural materials, including hay and straw. Designed for reliability in demanding environments, it features heavy-duty construction and a powerful motor. The machine is highly versatile, capable of dicing various produce such as potatoes, radishes, pumpkins, and melons, while also functioning as a corn thresher and lawn mower.

Key Features

Design Highlights

- Adjustable cutting length for customized output
- Multiple feed inlets for various material types
- Integrated wheel system for mobility
- Enclosed cutting mechanism for enhanced safety

Applications

Hay Cutting, Straw Processing, Vegetable Dicing, Corn Threshing, Lawn Mowing

Safety & Operation

Safety Features

- Protective guards
- Emergency stop mechanisms
- Enclosed cutting chamber

Operational Specs

Ideal For

Livestock Feeding • Small Farms • Medium-sized Operations
