

HDMI 1.4 AM to AM Cable

This HDMI 1.4 A-male to A-male cable is designed for transmitting high-bandwidth digital audio and video signals. It supports resolutions up to 4K at 30Hz, 3D video, and Audio Return Channel (ARC).

Overview

High-Definition Connectivity

This HDMI 1.4 AM to AM cable is engineered for the reliable transmission of high-bandwidth, uncompressed digital audio and video signals. Designed with male A-type connectors on both ends, it provides seamless connectivity between a wide range of devices, including TVs, monitors, gaming consoles, Blu-ray players, and computers. Its robust construction ensures optimal signal integrity and long-term durability for professional and home entertainment setups.
