

Heated Table Appliance

This heated table appliance provides warmth in a localized area. The appliance features a built-in heating element within a low-profile table.

Product Overview

Innovative Localized Heating

The Heated Table Appliance provides an efficient and unobtrusive way to deliver warmth in localized settings. Designed with a sleek, low-profile aesthetic, it functions as both a stable furniture piece and a reliable heating source. This electrical unit is ideal for creating comfortable work or lounge spaces in cooler environments.
