

Heavy-Duty Anchoring Bolt Assembly

This is a heavy-duty anchoring bolt assembly for securing machinery and equipment. It features a threaded rod, flared anchor plate, washers, and nut.

Product Overview

Heavy-Duty Anchoring Bolt Assembly

This heavy-duty anchoring bolt assembly is engineered for the secure mounting of industrial machinery and equipment. Featuring a robust threaded rod, a flared anchor plate for optimal load distribution, and essential hardware including washers and a nut, it ensures stability in demanding environments. Constructed from durable materials, this assembly is designed to withstand significant vibration and heavy operational loads.

Technical Details

Included Components

- Threaded rod
- Flared anchor plate
- Washers
- Tightening nut

Primary Application

Machinery Mounting, Equipment Securing, Heavy-Duty Industrial

Performance Features

Key Performance Attributes

Vibration Resistant • High Load Capacity • Stable Mounting
