

# Heavy-Duty Axle Beam

This is an American series axle beam designed for use in heavy-duty vehicle applications. The axle beam is made from high-strength materials for exceptional support and stability.

## Overview

### Heavy-Duty Axle Beam

This heavy-duty axle beam is engineered for robust performance and durability in demanding automotive applications. Constructed from high-strength materials, it provides exceptional support and stability for trucks, trailers, and other heavy-duty vehicles. The design features precision-engineered mounting points and a corrosion-resistant finish to ensure reliable operation and long-lasting protection against wear and tear.

## Technical Specifications

### Supported Load Capacities

- 8
- 11
- 12
- 13
- 14
- 15
- 16
- 20

Standard Track Length	1850 mm
Available Beam Sizes	Round 127mm, Square 120mm, Square 127mm, Square 150mm
Customization	Other track lengths available upon request
