

Heavy-Duty Bolt Cutter

This heavy-duty bolt cutter is designed for cutting bolts, rods and other tough materials. It features hardened steel jaws and a compound action mechanism to multiply force, providing increased cutting power with less effort.

Product Overview

Heavy-Duty Bolt Cutter

This heavy-duty bolt cutter is engineered for cutting bolts, rods, and other tough industrial materials. Featuring a compound action mechanism, it multiplies force to provide increased cutting power with significantly less user effort. The tool is built for longevity with hardened steel jaws and a corrosion-resistant finish, making it an essential asset for construction, maintenance, and heavy-duty industrial applications.

Technical Specifications

Jaw Material	Hardened Steel
Surface Finish	Corrosion-resistant coating

Features

Key Features	Compound Action Mechanism, High Leverage Design, Corrosion Resistant, Hardened Steel Jaws
--------------	---

Applications

Ideal Applications

- Construction
- Industrial Maintenance
- General Heavy-Duty Cutting
