

Heavy-Duty Bolt Cutters

Heavy-duty bolt cutters are designed for cutting bolts, rods, and other metal materials. They feature hardened steel blades for durability and high leverage handles for increased cutting power.

Product Overview

Professional Heavy-Duty Bolt Cutters

These heavy-duty bolt cutters are engineered for high-performance cutting of bolts, rods, and various metal materials. Designed with high-leverage handles, they provide the increased cutting power required for demanding industrial and construction tasks. The construction features hardened steel blades to ensure long-lasting durability and consistent performance in maintenance applications.

Key Features

Cutting Capabilities

- Bolts
- Rods
- Hardened metal materials

Design Features

High-Leverage Handles, Ergonomic Grips, Hardened Steel Blades

Applications

Primary Applications

Construction • Industrial • Maintenance
