Product Overview

Industrial-Grade Woodworking Performance

This heavy-duty woodworking vise is engineered from high-strength cast iron rated at 30,000 PSI to provide maximum stability for demanding workshop tasks. It features a versatile quick-release trigger mechanism for rapid adjustments, significantly improving workflow efficiency when clamping or releasing workpieces. Designed with an adjustable front stop, this tool functions seamlessly as both a standard vise and a tail vise, making it an essential addition to any professional woodworking setup.

Technical Dimensions

Core Dimensions

10.5 inch
Jaw Width

15 inch
Jaw Opening

4 inch
Throat Depth

Material & Construction

Cast Iron, 30,000 PSI Tensile Strength, Zinc Plated Screw, Precision Machined

Features

Key Functionality

- Quick-release trigger for rapid clamping adjustments
- Adjustable front stop (dog) for dual-purpose operation
- Fused tommy bar safety mechanism designed to bend before over-stressing
- Dual predrilled mounting holes for secure workbench installation
