

Heavy-Duty Concrete and Masonry Anchors

These heavy-duty anchors are designed for secure fastening in concrete and masonry. They include sleeve anchors with expansion sleeves and concrete wedge anchors for high load-bearing applications, suitable for various construction and industrial uses.

Product Overview

Heavy-Duty Concrete and Masonry Anchors

These heavy-duty anchors are engineered for secure fastening in concrete and masonry substrates. The selection includes sleeve anchors featuring expansion sleeves for reliable grip, alongside concrete wedge anchors optimized for high load-bearing applications. Designed for versatility, they provide strong and durable connections suitable for a wide range of construction and industrial projects.

Technical Specifications

Key Performance Features

High Load-Bearing • Expansion Grip • Heavy-Duty

Primary Applications

- Concrete Construction
- Masonry Fastening
- Industrial Installations

Available Anchor Types

Sleeve Anchors, Wedge Anchors
