

Heavy-Duty Dump Truck

This heavy-duty dump truck is designed for demanding construction and mining applications. It features a high-strength steel cargo box with reinforced sidewalls and a hydraulic lifting system for efficient material unloading.

Overview

Heavy-Duty Performance

This heavy-duty dump truck is engineered for demanding construction and mining applications, offering a robust solution for material transport. It features a high-strength steel cargo box with reinforced sidewalls and a reliable hydraulic lifting system to ensure efficient unloading. Built on a durable chassis with heavy-duty suspension, the vehicle is designed to maintain performance and reliability across challenging terrains.

Performance

Engine Performance

120 HP

Power Rating

Design & Build

Cargo Box Specifications

- High-strength steel construction
- Reinforced sidewalls
- Hydraulic lifting system

Chassis Type

Heavy-duty reinforced chassis

Comfort & Control

Cabin Features

Ergonomic controls, Driver-focused design, Comfortable seating

Application

Primary Applications

Construction • Mining • Heavy Hauling
