

Heavy-Duty Floor Scraper

This heavy-duty floor scraper is designed for removing tough materials from floors and other surfaces. It features a robust steel frame for durability and a wide blade for efficient scraping.

Product Overview

Professional Heavy-Duty Floor Scraper

This heavy-duty floor scraper is engineered for the efficient removal of tough materials from floors and various surfaces. Built with a robust steel frame, it ensures long-lasting durability in demanding industrial environments. It features a wide blade for maximum coverage and a specialized handle socket for improved leverage and operator control.

Technical Details

Frame Material	Steel
Common Applications	Construction, Renovation, Maintenance

Features

Key Design Elements

- Wide scraping blade for efficient material removal
- Robust steel frame construction
- Integrated handle socket for standard pole attachment
- High leverage design for enhanced operator control
