

Heavy-Duty Grinding Wheels

These grinding wheels are designed for heavy-duty applications. They are engineered for efficient material removal and long-lasting durability.

Product Overview

Industrial Grinding Performance

These heavy-duty grinding wheels are engineered for high-performance material removal in demanding industrial environments. Constructed with premium abrasive materials, they offer extended wheel life and consistent precision. Designed for reliability, these wheels are an essential tool for various heavy-duty grinding operations.

Technical Specifications

Abrasive Grade	ZA10
Bond Type	YB
Maximum Operating Speed	80 m/s

Features

Key Performance Indicators

80 m/s
Max Speed

Suitable Applications	Heavy-Duty Grinding, Industrial Use, Material Removal
