Product Overview

Industrial Strength Lifting Solution

This heavy-duty hand winch hoist is engineered for demanding industrial and construction environments where reliable load positioning is essential. Constructed from high-strength cast aluminum alloy, the unit offers an optimal balance between a lightweight profile and structural integrity. It features a flat bottom design to ensure maximum stability under load and integrates a shear pin system to prevent hazardous overloading during operation.

Technical Specifications

Construction Details

- High-strength cast aluminum alloy body
- Large flat bottom surface for stability
- Adjustable lever handle
- Galvanized steel wire rope

Body Material

Cast aluminum alloy

Safety Features

Shearing pin, Overload protection, Locking mechanism
