

Heavy-Duty Hook and Chain Link Connector

This heavy-duty connector features a robust construction with an integrated hook and chain link design. It is characterized by its durable metal finish and suitability for industrial applications requiring secure connections.

Product Overview

Heavy-Duty Hook and Chain Link Connector

This heavy-duty machine hardware component is engineered for demanding industrial applications that require secure connections and reliable load-bearing capabilities. Featuring a robust construction with an integrated hook and chain link design, it ensures seamless integration into existing mechanical systems. Its durable metal finish and precision engineering make it an ideal solution for heavy-duty roller chain setups.

Technical Specifications

Model Designation	C2060H
Compatibility	Standard Roller Chain, C2060H Series

Key Features

Design Highlights

- Heavy-duty robust construction
- Integrated hook and chain link design
- Durable metal finish
- Precision engineered for industrial use

Best For

Load-bearing • Industrial Machinery • Secure Connection
