

Heavy-Duty Industrial Diesel Generator Set

This heavy-duty industrial generator set is engineered for reliable power in demanding environments. It features radiator cooling, an exhaust system with a silencer, a control panel, and a sturdy base frame.

Product Overview

Industrial Power Solution

This heavy-duty generator set is engineered for high reliability and efficiency in demanding environments. Featuring advanced engine and alternator technology, it provides consistent performance with low fuel consumption and minimal noise levels. It is an ideal power solution for critical infrastructure, including telecommunications, healthcare facilities, and large-scale industrial operations.

Technical Specifications

Power Output Range

10 kVA

Minimum Power

2500 kVA

Maximum Power

Insulation Class

Class H

Supported Frequencies

50Hz, 60Hz

Performance Features

Key Performance Attributes

- High electrical efficiency
- Low fuel consumption
- Low emission output
- Reduced noise operation
- Strong anti-interference capability
- Extended overhaul intervals

Application Scope

Typical Applications

- Telecommunications
- Healthcare facilities
- Hotels and hospitality
- Commercial shopping centers
- Mining and industrial sites
